z · ordinal
ensemble
Isolation Forest
half-space trees
Mahalanobis
anomaly score
split-conformal p
reported, not decided
decision cap
by cold-start phase
learning
observe only
graduated
≤ flag
active
may block
tightens only; never relaxes
ADWIN drift
resets feature normalisation; keeps the reservoir
operator feedback — active anomaly discovery
an approve / reject on a held call scored > 0.3 flows back into the reservoir and the score tracker, so the layer moves toward the operator's notion of normal.
